

STUDENT ORGANIZATIONS

Student clubs and student organizations must be chartered and operated in a manner consistent with the mission and goals of the school district. Groups wishing recognition must complete the attached procedures that describe the process for club or co-curricular application and consideration.

Groups wishing to apply to be a recognized club need to submit their application to the building principal at the school where club activities will be held. Following approval by the principal, the club's application will be submitted to the Superintendent of Schools, and then to the Education Committee. Each of the aforementioned individuals must give written approval for the club to proceed in the recognition process mission.

Once an organization has been recognized as a "club", a group may not propose elevation to team status until two complete "seasons" have elapsed. The district athletic director is responsible for monitoring the operation of all clubs and athletic activities. Club coaches must report annually to the director the following:

- Participants by school and gender, number of coaches, parent advisors, volunteers, number of practices, and events (meets). This report will be filed as part of the Augusta School Board meeting.
- Co-curricular, non-athletic clubs will report via the school principal the following information:

Participants by school and gender, number of coaches or advisors, parent advisors, volunteers, number of practices, and events (meets). This report will be filed as part of the Augusta School Board meeting.
